Comtech EF Data is pleased to announce the general availability of the CRS-280L 1:N L-Band Modem Redundancy Switch, with a current ARO of 30 days.

This new switch supports systems with one backup and up to 10 prime channels. It is designed for use with the CRS-300 Modem Protection Switch and the SMS-7000 Modem Protection Switch.

The CRS-280L features redundant power supplies with status LEDs on the front panel. It can be configured for 4 to 10 channel applications. When used with the CRS-300, 10 channels are supported and with the SMS-7000, a maximum of 8 channels are supported. Refer to the price catalog for specific configuration breakdowns and available options. And, for more technical detail on CRS-280L, please refer to the datasheet and the Installation and Operation Manual.

If you have any questions about this release, please contact your Comtech EF Data sales associate.
